- Occupational/ Speech Therapy
- Home Health Aide/ Home Maker's Services

At Home Health One LTD, our highest priority and mission is to meet the health and wellness needs of our patients by providing a continuum of personalized programs and services through a *seamless* transition from an institutional setting to your home. We demonstrate the success of our health care delivery system *one* patient at a time through the fulfillment of their needs in skill, efficiency, & compassion.

About Home Health One LTD...

Our home health care company works to provide a skilled alternative to extended hospitalization or nursing home care. We bring services to you by a variety of healthcare professionals that work with our staff and your doctor, in physician orders that coordinate to your care and a written plan of medical attention that caters to the wellness of your physical, mental, and social well-being. Our staff is committed to going beyond routine home care in treatment through weekly skilled medical visits to monitor progress, encouraging recovery.

How Do I Qualify?

A patient must be homebound with a condition due to an illness

or injury that restricts the ability *or* is medically contraindicated to leave the place of residence, except with the aid of

supporting devices. We specialize in series for: older, disabled/ convalescent persons who do not require institutional care, but still need assistance in meeting ongoing health care needs; and for the ill that would like to participate in the rehabilitation process.

A home health patient must also be supported through Medicare or any other private insurance.

Did you know?...

Most patients would prefer to recover at home, where recovery occurs much quicker given the comfort of their surroundings. Familiar surroundings place patients at ease, calms fears, and brings a sense of normalcy.

Why Choose Home Health One LTD?

Choosing a health care provider is one of the most important decisions a person can make! MDs and their patients have a preference for a provider who cares, is knowledgeable, dependable, and accessible- A company that takes the *time* to go over all your options and relate to you as a person and *not* just a patient. We are well aware that MDs concern for his/her patients go beyond their clinical visits, so we at HH1 focus on working with your doctor and

his/her health care staff, in delivering exemplary service. We continue to change in practice, technology, and with the laws governing healthcare delivery as to maintain professional competency in various disciplines.

SECURING YOUR FUTURE

Every three years, we voluntarily request that The Joint Commission reviews us against their set of accreditation requirements. Our continued success in the accreditation program is a direct reflection of our commitment to our mission and vision. We request that if you have questions about our report that you call us. Questions can be forwarded to our Quality Improvement Department whose director can discuss any or all of this report. We look forward to serving you in addition to providing treatment that will help you return to health and independence!
